

About SECURITECH DEFENSE Conference

18-19 September 2019
POLISH AIR FORCE UNIVERSITY

We have the pleasure to invite you to participate in the 1st Scientific and Technical Conference **SECURITECH & DEFENSE 2019** titled “Military and civilian high tech.” The Conference will take place on 18-19 September 2019 at the Polish Air Force University in Dęblin. It is organised by Euro-Media, a publisher of trade magazines, including a bimonthly titled “Ochrona Mienia i Informacji”, and the Faculty of National Security and Logistics, the Polish Air Force Academy, the Scientific Partner. The leitmotif of organising the Conference is a meeting of experts on the defence and protection of military facilities with representatives of companies running business in the field of new defence and protective technologies.

The purpose of the Conference is the exchange of expertise and views between soldiers, military civilian staff and academia, and also experts from research institutes, associations and companies, from the country and abroad, who on a daily basis deal with technical protective provisions, information protection, cyber security, physical protection and fire prevention in facilities, etc. The Conference is also an opportunity to meet with the speakers and experts on security, law, IT, electronic and mechanical protective provisions, to find out about various solutions for protecting facilities of high importance to the national security and to present state-of-the-art devices and solutions. The organisers have planned exhibitions and presentations of equipment, special shows and meetings with experts at consultation desks. The Conference is also a chance to acquire knowledge that may contribute to minimising conceptual and installation mistakes in investments made by the Armed Forces in the context of defending and protecting military facilities.

State-of-the-art trends and guidelines

Agenda

Day 1 of the Conference, 18 September 2019

- Registration
- Official opening of the Conference in the area of the Polish Air Force University in Dęblin
- **(COFFEE/TEA)**
- Theme-related speech “The use of new technologies in forecasting the evolution of military and non-military threats in the 21st century”

- Theme-related speech “Cybersecurity”
- Technical Partner’s Presentation
- **COFFEE BREAK - visiting Partners’ stands**
- Theme-related speech “New technologies in military logistics”
- Technical Partner’s Presentation
- Theme-related speech “The role and importance of new technologies in the development of civilians’ self-defence abilities in the conditions of a military and non-military threat.
- Technical Partner’s Presentation
- Theme-related speech “Using Big-Data systems to monitor and forecast threats”
- Theme-related speech “New technologies in planning and programming the operational ability development of the Polish Armed Forces”
- Technical Partner’s Presentation
- Theme-related speech “High tech in the wars of the future”
- Summary of the Conference, prize draw and giving certificates
- **LUNCH in the JABŁONOWSKI PALACE**

Organisers

Euro-Media Publishing Group - the publisher of monthlies: “Chłodnictwo i Klimatyzacja”, “Świat Szkła” and “Polski Instalator”, and bimonthly “Ochrona Mienia i Informacji”. It is also an organiser of specialist technical and scientific trainings and conferences addressed to professionally selected audience, i.a. designers, fitters, investors and final users: retail facility administrators and public administration. The subjects of the trainings and conferences relates to the topics discussed in the papers published by the Publishing Group, therefore subscribers and readers are among the participants of those events. The publishing portfolio of Euro-Media comprises yearbooks, trade catalogues and thematic supplements published as part of the magazines that present selected topics and problems in detail. The Publishing Group cooperates with trade fairs, trade associations, non-governmental organisations and public institutions.

An important event organised by the Group is the yearly scientific and technical conference SECURITECH that has been held since 2015 together with Euro-Media and the Central Training Centre of Prison Service in Kalisz.

The Faculty of National Security and Logistics at the Polish Air Force Academy, in the area of which the Conference will be held, is a military university seated in Dęblin that teaches professional soldiers and candidates for professional soldiers for the needs of the Polish Armed Forces and air force staff for the civilian service. “The School of Eaglets” in Dęblin has been operating since 14 April 1927. At presents it is a combination of over 90-year-long tradition with modernity and practical approach to teaching. The University’s name, structure and directions of study have been changed several times. In each case the modifications arose from the concern for the high standard of teaching and the best possible performance of duties. In 1968 the School of Eaglets became a university, and was named “Wyższa Oficerska Szkoła Lotnicza” (WOSL, “Aviation Academy for Officers”). In 1971 the first group of students graduated from WOSL; each of them was titled

engineer-commander and became a third class military pilot. It took a great deal of effort to provide the teaching staff and instructors a possibility of further scientific and professional development. The infrastructure and research and teaching base has been constantly developed. Since 1 September 1994 the University started operating in a new organisational structure under the name “Wyższa Szkoła Oficerska Sił Powietrznych” (“Air Force Academy”). At that time essential changes in the teaching programme were introduced and the directions and specialities of teaching were corrected. On 1 October 2018, pursuant to the decision of the Ministry of National Defence, the School of Eaglets became the Polish Air Force University (Lotnicza Akademia Wojskowa), and the change of the name was not only technical. It also involves new challenges that the facility in Dęblin needs to face, and is a form of appreciating the achievements, teaching standards and school's elite status. The Faculty of National Security and Logistics found in the University's structure teaches future specialists in military logistics, transport and air safety. The Faculty is one of the two main Conference organisers.

Participants

» Representatives of the Facility Defence and Protection Unit of the Polish Armed Forces General Command

» Representatives of the Facility Protection Unit of the Polish Army General Staff

» Representatives of the Facility Defence and Protection Department of the Inspectorate of Armed Forces Support

» Representatives of 4 Regional Logistic Bases (RBLog)
